

# SIKA AT WORK

## BASEMENT WATERPROOFING OF COUNTDOWN MT ROSKILL

WATERPROOFING: SikaProof® Bentonite

BUILDING TRUST

# COUNTDOWN, MT ROSKILL AUCKLAND, NZ.

Watertight the Waterproofing People Ltd installed 7,000m<sup>2</sup> of SikaProof Bentonite.

## PROJECT DESCRIPTION

A new Countdown supermarket was being built by Watts & Hughes Construction in the Auckland suburb of Mt Roskill.

## PROJECT REQUIREMENT

A proven, durable, waterproofing solution was required for the 7,000m<sup>2</sup> below ground carpark area beneath the supermarket.

## SIKA SOLUTION

Jawa Structures Ltd specified SikaProof Bentonite. The versatility of this system means that SikaProof Bentonite can be installed to an already formed/ poured wall, in addition to applications where concrete is poured directly against it.

Watertight the Waterproofing People Limited are experienced Sika Approved Contractors in the installation of SikaProof Bentonite. As specialist contractors they appreciate the advantages that the system offers them as an installer. It's arguably the best system on the market for:

- Damage resistance - the heavy non-woven geotextile cover provides unparalleled wear and damage protection.
- Self-healing - the ability of the bentonite clay component to swell and seal any minor holes is unique.
- Flexibility - the product is able to deform to accommodate intricate foundation and connection details.

## SIKA PRODUCTS

SikaProof Bentonite System: 7,000m<sup>2</sup>

## PROJECT PARTICIPANTS

Client: Progressive Enterprises Limited

Specifier: Jawa Structures Limited

Main Contractor: Watts & Hughes Construction

Specialist Applicator: Watertight the Waterproofing People Ltd

Sika Organisation: Sika (NZ) Ltd
